YOUR QC AND RAPID DIAGNOSTIC PARTNER IN THE UK AND IRELAND

Clinical solutions helping you to make
the world a safer and healthier place

abscientific.com

We're different...

Every company likes to think that, don't they?

But in our case, it is true. We offer a **unique range** of clinical solutions for the UK and Ireland, and seek out the latest innovation from world-leading manufacturers.

If you're looking for just another catalogue company, that's not us!

Our expert sales and operations teams will support your decision-making and enable you to influence your internal stakeholders in solution adoption projects. Whether that's with on-site demonstrations or trial units, information sheets, training and testimonials ~ it's our job to help you to find your best solution.

*“...Throughout the whole implementation, the feeling has been that **AB Scientific have worked in partnership with us** in order to improve and simplify the running, monitoring and trending of internal quality control procedures...”*

**HELPING YOU DELIVER
YOUR RESULTS
CONFIDENTLY**

Our Mission

Our goal is simple: to make the world a safer and healthier place. The way we do that is always to put our customers at the heart of everything we do. Our focus is to find the best solutions for you.

Ensuring reliable supply is key. We hold UK stock with next-day delivery.

And we're quality champions, we list every product with care and scrutiny.

Our business mission is simple: YOUR experience of the highest possible level of customer and technical support, so you remain compliant and confident.

It really is 'all about you'!

Our goal is to take the supply worries away, so you can enjoy assured delivery, with an expert technical supplies partner.

“

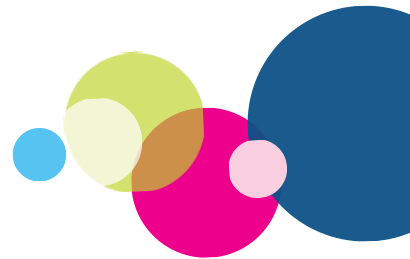

Our goal hasn't changed since 2014: find brilliant products, understand them properly, look after customers and don't make things more complicated than they need to be... ”

Mark Algar
Co-Founder

Why work with us?

There are certainly bigger players in the marketplace – but we're a passionate team of experts with a bigger focus than just 'selling'.

PERSONAL

We're not a typical catalogue company. **Understanding your goals** is as important as your order volume. We grow with partners long term, and have a reputation for customer experience that is 'the golden egg'. Compliance and quality delivery are core goals.

INSIGHTFUL

Your delivery targets become ours: whether that's a cost reduction or improved quality outcomes. **We'll happily drill the data** and track your workflows to find pivotal insights on refinements and enhancements. Our supplier relationships give you expert access.

PRACTICAL

Hands-on is our style! We're out in the field, on the road, and as with you as you'd like us to be. We'll meet at a desk, in a corridor or in a car park on Teams – so we're close to what works (*and what doesn't!*) **Real world workflows** matter to us; efficiency saves lives.

YOUR LABORATORY
& POINT OF CARE**

Our Supply Chain

Reliable supply is our baseline ~ **refining delivery processes is an ongoing focus.** We're pursuing our goal of becoming carbon neutral as soon as possible. All our cold-chain shipments are packaged in fully recyclable paper-based packaging.

UK & Ireland Supply

With both our UK and Ireland warehousing, we're known for reliable supply with responsive delivery times – often next day.

You can rely on a dedicated Account Manager handling stock availability, reviewing your demand plan with you. We consolidate shipments.

Sustainable Practices

Holding stock of market-leading manufacturers locally in the UK, we use large global shipments reducing environmental impact.

Polystyrene and plastic were removed from our refrigerated cold-chain shipping, and solar power and LED lighting have cut warehouse carbon emissions.

Innovative Product Focus

The ranges we carry reflect the latest research into clinical and manufacturing solution needs.

Whether it's decontamination products or Rapid Diagnostic platforms, we develop strong categories for partners to stay compliant, make savings and deliver improved outcomes.

Customer Experience

Your experience of a reliable supplies partner matters to us – we track satisfaction closely.

We'd hate to be 'pushy sales types'! Our DNA is supportive, using our clinical experience (in many cases) to guide your growth into new technology ~ so it fits your needs and goals.

We're working with **Trident Utilities** to execute our Carbon Reduction Plan and participate in **DHL's GoGreen+** initiative to use sustainable aviation fuel with **~80% less CO₂e**.

Industry recognition for our sustainability initiatives:

SBTi-compliant climate targets

Please note: there may be regional variations in product availability between the UK and Ireland ~ just ask us!

We're helping to optimise Molecular QC in the NHS

Working with almost every NHS hospital, partnering for improved efficiencies

[See our product range](#)

Third Party QC is our expertise: using external run controls and verification panels consistently builds confidence in your test results ~ far beyond just manufacturer QC.

And accurate, sensitive diagnostics are critical to the precision of patient results.

We work with labs to monitor daily test variation, lot-to-lot test kit performance, and individual operator performance, helping lab managers identify trends in their results.

We offer Molecular QC ranges that are easy to use, consistent, reliable and traceable.

Fridge-only

We're experts in ready-to-use, highly stable QC with superior shelf life to reduce waste, costs and release lab critical freezer space

Fully-aligned

Our Molecular QC is compatible with all assay platforms and viable for viruses, bacteria, fungi, parasites and bacteriophages

Entire genome

Entire microorganism genome QC ~ not synthetic sequences of RNA/DNA matrix, so a sample mimics a true clinical specimen

We work with your specific needs, guiding validation and enabling full compliance.

Molecular Controls

Purified DNA

Serology Controls

Rapid Test Controls

Precision results when time can't be wasted ~ Rapid Diagnostics

Our **Rapid Dx** division delivers fast, innovative point-of-care and laboratory diagnostic solutions across the UK and Ireland. We specialise in agile cartridge-based molecular platforms, ultra-rapid antimicrobial susceptibility testing, sepsis and infectious disease biomarkers, and next-generation host-immune response assays ~ all designed to speed up clinical decisions, support antimicrobial stewardship, and improve patient outcomes.

Backed by responsive technical expertise, tailored implementation, and long-term supplier partnerships - we put you, the customer, at the centre of everything we do.

Working with laboratories in all diagnostic settings, with a point-of care specialism.

EMERGENCY DEPARTMENTS

Enabling fast, point-of-care testing and imaging **in A&E to accelerate triage and patient treatment. Immediate results** for life-critical decisions, able to reduce overall admissions, improve patient throughput.

COMMUNITY DIAGNOSTIC HUBS

Also suited to in-community **high-capacity diagnostic centres** located close to patients. Rapid Diagnostics solutions bring local accessible imaging and testing, **shorter overall waiting lists** and integrated referral pathways.

OUTPATIENT DEPARTMENTS

Rapid Diagnostics enable seamless outpatient services or in-clinic visits, efficient follow-ups and **fast patient management**. 'One-stop' appointments, fewer visits, **better continuity of care**.

- ✓ **Dedicated Rapid Diagnostics team**
- ✓ **Validation & onboarding support**

- ✓ **Proven compliant solutions**
- ✓ **UK & Ireland NHS insights**

View all our Rapid Diagnostics

Quality Control in every setting

That's part of our difference: we're passionate that innovative solutions can deliver best value at every level, and help you to work with more confidence and efficiency.

We connect a wide range of clinical and lab teams with carefully selected and tested market-leading products and solutions to help them deliver the results they need.

**But our commitment extends
beyond 'supplying products'
~ we'll partner with you.**

“

“... At AB Scientific, we believe better diagnostics lead to better patient care. That's why we've built a strong range of independent quality controls and rapid diagnostic solutions that help laboratories deliver results they can trust – quickly, accurately and consistently.”

Our independent QC products give laboratories confidence that their testing systems are performing as they should, while our rapid diagnostic solutions can help get the right result sooner, allowing clinical teams to make faster, better-informed decisions. The result is simple: better results, less wasted time, lower costs and, most importantly, better outcomes for patients. We work with some of the world's best manufacturers, but we remain proudly independent. That means we can focus on finding the right solution for the laboratory and the patient – rather than simply selling what happens to be in our catalogue...”

Greg Dobson - Co-Founder

Whether your organisation is looking to strengthen infection prevention, modernise laboratory workflows, or introduce a new diagnostic platform, we'll be here to help.

~ always bringing the best solutions
